

KA'ALA SYSTEMS
TECHNOLOGY CORPORATION

Ka'ala Systems Technology's primary business area is Telecommunication Services. We provide a complete range of IT and communications systems services for the design and implementation of business solutions using the latest, most leading edge IT technology for commercial entities, as well as federal, state, and local government agencies.

We are experts in planning, designing and building multi-departmental database management systems that integrate the many "islands of information" that exist in most local governments, state governments, regional, and national (federal) agencies. KST is highly skilled at analyzing an organization's work functions and working with management and staff to evaluate the agency's short- and long-term information management needs and objectives. Satisfying KST customer requirements and ensuring their ultimate satisfaction will always be our top priority. KST manages its entire workload, present and future, with minimal overhead, leaving more value to its customer community and saving them money.

Ka'ala Systems Technology Corporation is excited and honored to be an awardee on the U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), NOAA Mission Information Technology Services (NMITS) contract.

CORE MANAGEMENT COMPONENTS

Enterprise Services

Customer Support Services

Mission & Business Applications, Tools, Portals & Web Services

Ka'ala Systems Technology is member of Veteran Technology Integrators (VTI) NMITS Team which consist of a select group of companies that provide immense depth and breadth of capabilities, services and solutions to meet the ever evolving requirement of NMITS.

Contract Description: The NOAA Mission Information Technology Services (NMITS) Blanket Purchase Agreement (BPA) has a five year base period of performance, plus one five-year option period. NMITS provides NOAA enterprise IT services that enhance the Administration's return on investments and achieve significant cost efficiencies for information resource management. NMITS enables economies of scale, consistent standards, and comprehensive IT services necessary to develop a secure, reliable, technically robust operating environment to support NOAA's mission and goals. NMITS also helps ensure the highest data quality for emergency management officials, decision makers, researchers, and the general public. Task orders may have a period of performance up to 60 months past the contract end date. NMITS is a mandatory use contract that provides NOAA-wide coverage for IT Core Management Components and Service Areas as well as Cross-cutting Services.

- **IT Core Management Components include:** Enterprise Services; Customer Support Services; Mission and Business Applications, Tools, Portals, and Web Services; Enterprise Computing, Cloud, Storage, Shared and Field Services; Data and Voice Network Services; and Cybersecurity and Information Assurance Services.
- **Cross-cutting Services include:** Program Management; Subcontracted Technical Support Services; Call Out/Per Call Support Services; Surge Support Services; and Deployment Support Services.
